RAILROAD

Refer to Assembly Instructions Sheet

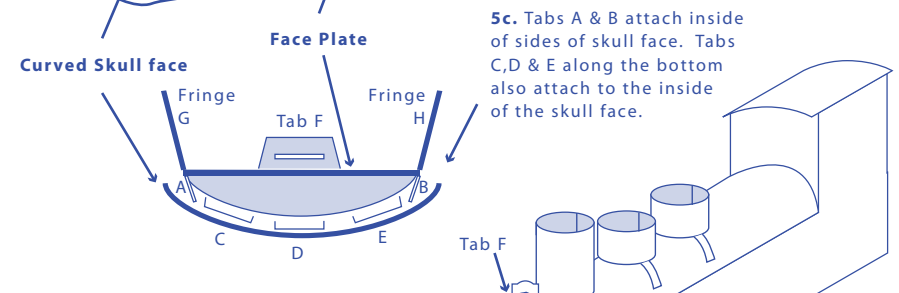

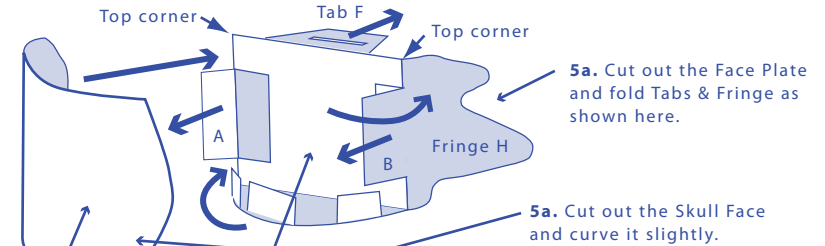

Parts & Pieces Sheet 6B

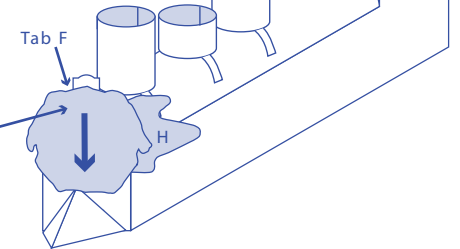

Skull Face

5. Cut & score the pieces for the Skull Face. Fold as shown here. Pre-curve the skull face and glue to the face plate using the tabs as shown here. Then hang the whole face assembly by placing the tab F over the locomotive headlight.

5d. The top Tab F (with slot) slides over the top of the light to attach skull mask to the Locomotive. See photo for more details.

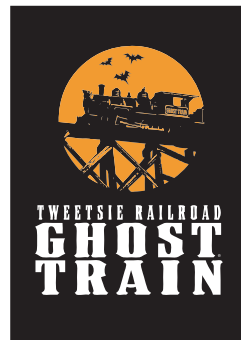

TWEETSIE[®]

RAILROAD

Each October, Tweetsie Railroad's #190 locomotive is dramatically transformed into ... the **GHOST TRAIN**. Brave passengers board the train for a scary journey into the night, where terror lurks around every bend. Here we see that mischievous **Darkus Knight**, Tweetsie Railroad's Halloween Host, has usurped Casey Bones as the Ghost Train's engineer.
